This program uses the C# language. This program's goal is to show that I have an understanding of how the list box, check box, and radio button controls all work. I used each one to alter the string of text that would be output by the program. The list box changes the color of the text. The radio button will set whether the text is to be bold. And the check boxes will alter the message that is displayed. This program could be improved the expansion of options.
